Introduction about myself

For the position as a frontend developer at your exciting company
I am motivated and energized for working and be in an environment with developement in frontend. To code is not only a job goal for me, but also something I take home and want to futher craft or gather new knowlegde. Its a dynamic field, so new and better code will always come, more awesome CSS and animation and how to make it easier for the user.
To have structure within data, documents and task is also a trait for me, so the deadline and requirements can be uphold.

Educational experience

Computer science • Roskilde Zealand
August 2018 - Januar 2021

5 Semestre.

I took this this diploma with frontend as main course, so I could establish myself better in programming, software to some extend and advanced web skills – single page applacations too (SPA). It was primarily Javascript, ReactJs, HTML and CSS + Bootstrap
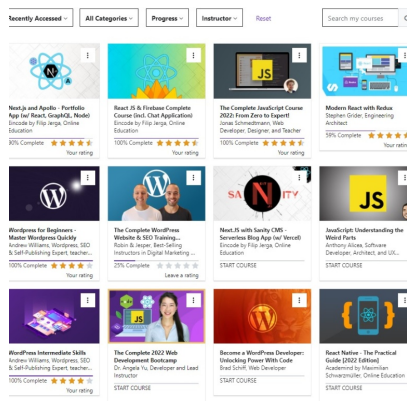

ITUcation • Copenhagen
2016 - 2016

6 Weeks paid course with C#, ASP.NET with MVC

Web Integrator, Technical School, Roskilde • Roskilde
2014 - 2016

Udemy overview from November

Latest project

✅ *Hobbies*

My hobbies when I have not the daddy hat on

- Adv web programmering / frontend development
- Photoshop design
- Video manipulation
- Gaming

Otherwise be with my son, family and friends.

Took a web programming education in PHP with HTML and CSS too.
Used Xampp for database and wrote SQL there.

We also used various adobe programs such as Illustrator, Photoshop and After Effects
